Hi Lene,

Late last Friday, WMH submitted the temporary berm stability analysis and liner inspection repair plan & schedule, as required by paragraphs **19.a.** and **19.f.**, respectively, of our Administrative Order on Consent (AOC). I've **attached** them for your convenience.

I've reviewed both deliverables and they seem fine, although I am having an outside geotech review the stability analysis. Barring any serious issues from a geotech's review (which I don't expect), I anticipate we'll approve both submittals-and would like to do so this week. However, we will clarify a deadline for completing the liner repairs based on the last paragraph/bullets of the 27 Jan Geosyntec letter. I estimate that date to be 25 April, which includes the time frames they suggest plus 2 additional weeks to produce a final CQA report.

Can you please let me know in the next day or two if DOH has any issues or comments on our anticipated approval per above ?

btw, on the 1Feb deliverables, I'm awaiting some internal feedback on my draft comments, and once I have, will send you those draft comments to you so DOH has an opportunity to offer input.

Thanks!
